

Additional Services the NJDA Provides to the Dairy Industry

To receive these services, contact the Division of Animal Health, (609) 292-3965

The following services are available to producers at no additional charge, as they are subsidized by grants or cooperative agreements:

- Johnes testing – ELISA and fecal culture
- Whole herd management evaluation, via NJCHAP Core Module
- Herd Biosecurity evaluation, via NJCHAP
- BSE: small cost-reimbursement for disposal costs (\$50/head) of cattle >30 months of age that have been tested in the federal BSE test program
- TB testing – comparative cervical testing of any caudal fold suspects
- Brucellosis herd testing – for any herd that may have cause for testing
- Disease Investigations in the field – requested by producers or veterinarians by calling the Division of Animal Health Office – may include tests and/or field necropsy
- Education and Outreach – Yearly Workshops on pertinent disease topics
- Animal Health Newsletters

The chart below describes the current laboratory tests available to the cattle industry. As of this date, all tests are provided at no charge. However, in the future, due to our Fee Bill, small charges will be assigned to each of them.

Additionally, specific tests requested by the producer that are not performed in the NJDA laboratory can be sent to the National Veterinary Services Laboratory (NVSL). NVSL tests may incur surcharges.

Cattle Laboratory Tests and Services Provided
by NJDA Animal Health Lab

SEROLOGY SECTION	VIROLOGY SECTION	PATHOLOGY SECTION	BACTERIOLOGY SECTION
Bovine Leukemia* Blue Tongue AGID ELISA Brucellosis BAPA Card Ring Rivanol Brucella abortus Johnes AGID Ova & Parasites	IBR Bovine Viral Diarrhea Parainfluenza 3 Fluorescent Antibody tests: Calf coronavirus Bovine parvovirus Bovine rotavirus Bluetongue Pseudorabies IBR BVD BRSV Leptospira antigens Chlamydia antigens Johnes ELISA Limited virus isolation available.	Up to 300 lbs: will resect animal, submit for infectious disease work, prepare H&E sections.
